"MathSciNet offers excellent content with powerful search functionality. The 'Basic Search' option provides a single search field, with 'Author' being the default value, reflecting the known usage pattern that the majority of searches in this database are for author. The journals database not only allows searching by title abbreviation, but also tracks recent title changes and links to tables of contents and journal homepages. The author database is an extremely useful tool for identifying and concatenating different versions of an individual's name. The Help documentation provides clear guidance, and a targeted help message frequently accompanies the notice that a search has produced no hits. The novice user will also appreciate the extensive online demonstration. MathSciNet has the edge on timeliness, both for bibliographic citations and for full reviews. It is a major advantage that all reviews from the beginning of MR are included."

- Unique articles, book reviews, and reports
- Editors who are prominent in their fields
- Subscribe to the 2002 print versions of *Journal of Algebraic Geometry* (JAG), *Journal of the American Mathematical Society* (JAMS), *Mathematics of Computation* (MCOM), *Proceedings of the American Mathematical Society* (PROC), *Transactions of the American Mathematical Society* (TRAN) or *Moscow Mathematical Journal* (MMJ), and receive the electronic versions for FREE.
- Once you arrange access to one or more free electronic versions of AMS journals, you will have access—at no additional charge—to two electronic-only journals of the AMS, *Conformal Geometry and Dynamics* (ECGD) and *Representation Theory* (ERT).
- Lower rate for the electronic version: Enjoy a lower subscription rate on JAMS, MCOM, PROC, TRAN, and JAG when you choose to receive only the electronic version.

AMS Journals Include:

- *Bulletin of the American Mathematical Society*
- *Conformal Geometry and Dynamics*
- *Electronic Research Announcements*
- *Journal of the American Mathematical Society*
- *Mathematics of Computation*
- *Proceedings of the American Mathematical Society*
- *Representation Theory*
- *Transactions of the American Mathematical Society*

Benefits of subscribing:

- There are over 6,000 AMS journal articles from 1996 to date available online.
- Articles are now posted online upon acceptance and before appearing in a print issue.
- You can search, browse, view math symbols, and print articles specifically in your discipline.
- We offer free email notification of new articles.
- There is extensive linking between MathSciNet and AMS electronic journals.
- AMS electronic journals are also accessible through OCLC FirstSearch, EBSCO Online, SwetsNet, Dawson Information Quest, and the U.S. Department of Energy's PubSCIENCE.

AMS-distributed Journals:

The AMS also distributes scientific journals from other publishers. Contact us for additional information or for a complete list of AMS-distributed journals, visit www.ams.org/distribution.

Chaotic Elections! A Mathematician Looks At Voting

Donald G. Saari

Required reading for anyone who wants to understand how we can avoid problems from appearing anytime any group is making a choice using a voting procedure.

Invariant Theory of Finite Groups

Mara D. Neusel
Larry Smith

The questions that have been at the center of invariant theory since the19th century have revolved around the following themes: finiteness, computation, and special classes of invariants. This book contains numerous examples to illustrate the theory, often of more than passing interest.
